

ERGOMAT[®] MATTING

POLYURETHANE
PROFILES PAGE 1

Ergomat Infinity

Ergomat Infinity Bubble is the only true anti-fatigue mat available with up to a lifetime warranty (in dry applications). The Infinity Bubble mat has the comfort of a polyurethane mat and has the added benefit of easy clean-ability due to its closed-cell/non-porous top surface. Ergomat Infinity Bubble also has extremely good chemical and UV resistance (except for organic solvents). Ideal if carts or trolleys must be used. Cleanroom ISO Class 5 (Class 100).

available in
Bubble or Smooth

Ergomat AB Classic

An anti-static mat that is ideal for dry and non-abrasive areas and where static electricity is present. Perfect for assembly and picking lines. Cleanroom ISO Class 5 (Class 100).

Ergomat AFS Complete

This mat is for all dry and damp areas where flame retardant and anti-static material is important. Great chemical resistancy for where chemical/oil spillage may occur. Ideal if carts or trolleys must be used. Cleanroom ISO Class 5 (Class 100).

available in
Bubble or Smooth

Ergomat Basic

A less-dense version of our polyurethane Complete Smooth. Specifically for non-critical environments or areas where durability is not of essence. Ideal if carts or trolleys must be used.

available in
Bubble or Smooth

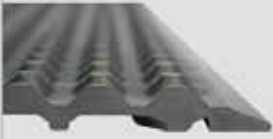

Ergomat Sticky Mats

The Sticky Mat provides a fast, convenient, reliable way to clean shoe soles or other items before entering a clean and sanitary area. Sticky Mats significantly reduce traffic-borne contaminants.

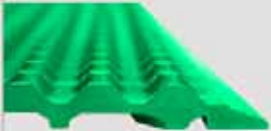

Each Sticky Mat consists of a stack of tear-off polyethylene films and each sheet is fully covered with adhesive to effectively capture dirt and dust from foot-traffic and equipment wheels before they enter controlled environments. A clear release sheet protects the top sheet of the sticky mat until it is ready to use. The corner tabs are consecutively numbered to show the number of remaining sheets, thereby helping you to keep track of the number of sheets remaining and preventing multiple sheets being removed at once.

Ergomat Nitril Conductive

A mat for usage in the electronics industry or for areas where static control is crucial due to sensitive equipment. Also available in a conductive version as well as in a die-cut version to allow airflow. Complies to USDA and CFIA standards/guidelines. Cleanroom ISO Class 5 (Class 100).

Ergomat Hygiene

The perfect mat for the food industry as well as for laboratories. Designed for easy clean-ability and daily sanitation. Great ergonomics combined with chemical resistance. Hygiene can be autoclaved (2x3 feet only) and has great anti-bacterial cleanability properties. Available in 4 vibrant colors for easy identification and cross contamination control. Complies to USDA and CFIA standards/guidelines. Cleanroom ISO Class 5 (Class 100)

Ergomat Nitril Smooth

Same characteristics as the Nitril matting, but in a smooth version for areas with trolleys and carts. Cleanroom ISO Class 5 (Class 100).

Ergomat Nitro

Specially designed for the food and metal industry, this mat is resistant against oils, many alkaline liquids and acids as well as hot metal shavings up to 1112°F. Nitro has a unique rounded cone design to provide great anti-slip properties even when exposed to fat or oils. Cleanroom ISO Class 5 (Class 100).

Ergomat Softline

The Ergomat Softline is designed for areas where resistance to oil, petrochemicals and heat is important (up to 1112°F). True ergonomics for wet environments. In case of excessive volumes of fluids, the Softline can be die-cut to allow for drainage. Great anti-slip properties even when exposed to fat or oils. Cleanroom ISO Class 5 (Class 100).

Ergomat Endurance

A hole mat designed for areas with extreme amounts of liquids (oils, water, etc) or accumulation of materials, where an ergonomic mat is no longer suitable and evacuation is of an essence. Cleanroom ISO Class 5 (Class 100).
